Subject: Microsoft Settlement

i believe that microsoft has had their day in court. the unfair standards they set have all but bankrupted a few OS upstarts and forced computer manu. not to allow them. I am a stock holder of Be, Inc. which made(makes) an incredible os that was 5 yrs ahead of anything they have now, and this was in 96..Be struck a deal with a few computer makers, but Microsoft forced them, compaq, HP, and Dell, into not using the alternative OS. Now Be is all but gone, the major part of the co. has been bought by Palm, inc. and who knows if we'll ever see it again.

As for MS idea of settlement, that would only hurt my other stocks, which are Apple.

Be done with MS already,. they had enough time in the spotlight.

Marc
